Part 1 of 2

Directions

Answer ONE of the two questions below. Write 100-200 words in the space provided below. (50 points)

- Since the global Covid-19 crisis, many more people have found themselves forced to study from home. In the present situation, those with computers, fast internet connections, and adequate space in their home-offices have been fortunate. Even in America, one of the wealthiest countries in the world, poor children sit in parking lots near free wi-fi spots to do their homework. What strategies do you think world governments can take to make sure that children, especially, are not left behind by these sudden changes?
- Imagine you had the opportunity to invite anyone you would like, alive or dead, friend, family member, or famous person, to lunch. Who would you choose, and why?

Please answer the following questions

In many countries in Europe and North America, the divisions in society seem to be persistent and even increasing; two examples are in the U.S., even after the presidential election, and in Great Britain with Brexit. 1) What do you think are the causes of the division? 2) What will be the consequences of the division in the future? Please answer these questions separately and clearly state the answer in easy English.
